PROFESSIONAL SUMMARY

Java Full Stack Developer with **1+ years of experience** building production web applications using **Java, Spring Boot, Angular, and MySQL**, with hands-on work in **REST APIs, JWT-based security, microservices, and AWS EC2** deployments.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, TypeScript, Python

Backend Technologies: Spring Boot, Spring Security, Hibernate, JPA, REST APIs, JWT Authentication

Frontend Technologies: Angular, HTML5, CSS3, Tailwind CSS

Cloud & DevOps: AWS EC2, AWS S3, AWS Lambda, Docker

Databases: MySQL (SQL, joins, indexing, transactions), Oracle SQL

Tools & Platforms: Git, Maven, Postman, Swagger, Dynatrace

Testing & CI Tools: JUnit, Mockito, Jenkins (basic)

WORK EXPERIENCE

Capgemini

Software Engineer

Sep 2024 – Present

Full Stack Developer

- Developed and maintained Java Full Stack applications, resolving backend and frontend issues using Spring Boot, Hibernate, JPA, Angular, and MySQL while adhering to clean design principles.
- Improved frontend efficiency by achieving a **15% reduction in page load** times, applied responsive design using Bootstrap, and deployed the app on AWS EC2 with Spring Security for backend protection.
- Provided production support and participated in debugging, testing, and release activities in an enterprise environment.
- CropDeal:** Built a full-stack agriculture platform with Angular, Spring Boot, Hibernate, and MySQL. Implemented JWT authentication, integrated Stripe payments, automated invoice generation, and dynamic dashboards for farmers, dealers, and admins.

PROJECTS

Ride Right

Java Full Stack with Angular, MySQL

- Designed a full-stack car sales and bidding platform using a microservices-based architecture, JWT-based authentication, supporting real-time bidding for **100+ concurrent users**.
- Implemented Spring Security RBAC and inter-service communication using **OpenFeign and REST APIs**.
- Built RESTful services using Spring Boot, JPA, and Hibernate with MySQL for persistent data storage.
- Developed responsive user interfaces using Angular and Tailwind CSS to improve usability and navigation.

System for Beacon Based Indoor Location Tracking - Patent, 202411042850

Published June 14th, 2024

- Built a beacon-based indoor location tracking solution using ESP-32 and BLE 4.2 for real-time position detection.
- Integrated backend services with a mobile application built using Java and Kotlin for real-time location updates.
- Applied AWS-based authentication mechanisms to ensure secure communication and data integrity.

EDUCATION

Lovely Professional University

Bachelor of Technology, Computer Science and Engineering, CGPA 8.37

St. Xaviers School

Higher Secondary, Percentage: 84.6

Phagwara, Punjab

2020 - 2024

Hazaribagh, Jharkhand

2018 - 2020

CERTIFICATIONS

- AWS Certified Cloud Practitioner CLF-C02
- Agile Software Development
- AWS Partner: Generative AI Essentials - Training Badge
